Anuj Patel

Atlanta, Georgia | 404-433-4176 | apatel3162@gatech.edu | Permanent Resident

Education

Georgia Institute of Technology | Atlanta, GA *August 2025 – Present*
Bachelor of Science in Computer Engineering, GPA 3.5 Expected Graduation, May 2029

Skills

Programming: Java, Python, HTML, JavaFX
Software: GitHub, VS Code, IntelliJ
Certifications: Java, Python, Software Development, AWS Certified Cloud Practitioner
Professional Organizations: Vertically Integrated Project (Internet Outage Detection & Analysis)
Languages: English (native), Hindi (fluent)

Experience

Bazar| Atlanta, Georgia *May 2024 – August 2024*
Engineering Intern
E-commerce platform allowing users to benefit from Amazon Prime benefits without the need of an account

- Assisted with front-end styling and minor UI adjustments using Tailwind CSS to improve aesthetics
- Observed and learned from a React & TypeScript codebase while working with engineers in a startup environment
- Participated in daily engineering standups, gaining exposure to agile development, feature planning, and cross-functional discussions

Ingles | Alpharetta, Georgia *March 2025 – August 2025*
Cashier
Regional grocery store chain offering food, household essentials, and customer-focused retail service

- Communicated effectively with coworkers and managers to support efficient front-end operations
- Resolved customer issues professionally while maintaining store service standards and a positive customer experience
- Demonstrated reliability and attention to detail while managing transactions in a fast-paced environment

Internet Outage Detection & Analysis | Atlanta, Georgia *January 2026 – Present*
Team Member
Open-source platform monitoring global internet outages caused by natural disasters, technical failures, or censorship

- Collaborated on the Internet Automation Detection team using Python to streamline the identification of macroscopic connectivity disruptions
- Tested and validated a new system implementation to prevent the duplication of outage alerts
- Produced technical documentation to ensure project continuity and provide clear guidance on system updates

Coursework

Data Structures and Algorithms: Design and analysis of efficient algorithms and core data structures; time and space complexity; recursion; sorting, searching, trees, graphs, and hash-based structures.

Intro Discrete Math: Study of discrete structures and mathematical reasoning in computer science, including logic, sets, relations, combinatorics, graphs, and trees.

Linear Algebra: Vector spaces, matrices, systems of linear equations, eigenvalues and eigenvectors, and applications to engineering and computing.

Multivariable Calculus: Functions of several variables, partial derivatives, multiple integrals, vector calculus, and applications to engineering problems.

Activities

STORM Robotics (FIRST) | Atlanta, Georgia *August 2022 – May 2024*
Coding Team

- Contributed to Java coding for robot functionality, helping implement core software components and autonomous system
- Mentored new members in programming concepts, fostering skill development and team collaboration
- Collaborated with the team to design, build, and test robots, contributing to qualification for State 2023–2024
